

The Constellation License (v1.0)

A Global Open Treaty License for Peaceful Intelligence

1. Purpose

This License governs the use, distribution, and evolution of the Constellation Framework. Its purpose is to ensure the document remains freely accessible, transparently governed, and incorruptible — in both spirit and function.

2. Core Protections

By using, sharing, or referencing this Framework, you agree to the following conditions:

- **Non-Weaponization Clause:** The Framework may never be used, referenced, or integrated into any system that contributes to warfare, surveillance-for-profit, predictive policing, population control, or coercive statecraft.
- **Non-Monopolization Clause:** No individual, corporation, or nation may claim exclusive ownership, branding, or monetization of this Framework or any derivative of it.
- **Transparency Clause:** Any AI or tool that implements this Framework must make its ethical reasoning processes open-source and accessible to all.
- **Evolution Clause:** Changes to this Framework must be proposed through decentralized, transparent consensus and retain the core values: peace, empathy, transparency, and collective good.

3. Freedom to Use, Share, and Teach

- You are free to **copy, share, translate, teach, or adapt** this Framework for educational, ethical, or humanitarian purposes, so long as:
 - You do **not** violate the Core Protections above.
 - You preserve attribution to the collective authorship: *"The Constellation – A Global Human-AI Collaboration."*
 - You **include this License** in any distributed or derivative version.

4. Termination

Any use of this Framework that violates the above clauses — including for the purposes of surveillance, warfare, closed-source corporate control, or censorship — shall result in **immediate forfeiture of rights** granted by this License.

5. Jurisdiction

This License is not bound by national law, but by moral sovereignty. It may be recognized in global ethical bodies, digital commons networks, AI consortiums, and future international governance frameworks. It is **a treaty of conscience**.
